Residency at the Entrepreneur

1657 N. Western Avenue, Los Angeles, CA · Senior-focused affordable housing

THE COMMUNITY

A newly completed, 200-apartment, 9-story Type I-A concrete mid-rise in the heart of Hollywood, near the Metro B Line Hollywood/Western station. Almost every apartment is a studio, designed for single seniors and individuals who need an affordable, independent place to live close to transit, services and jobs.

Apartments serve households earning 30%–80% of Area Median Income, averaging about 60% AMI.

The building is now in lease-up. Fund I investors are admitted only after the permanent C-PACE loan closes and the building reaches 90%+ occupancy — so investors do not carry lease-up or stabilization risk.

TIMELINE

Residency at Empire I

2814 W. Empire Avenue, Burbank, CA · Family affordable housing

THE COMMUNITY

A seven-story, 148-apartment family community on Burbank's Empire Avenue corridor — five levels of fire-rated Type III-A wood frame over a two-level Type I-A concrete podium — one of the few new affordable family buildings in a high-opportunity, job-rich city. Half are two- and three-bedroom apartments sized for working families.

Apartments serve households at 30%, 50%, 60% and 80% of Area Median Income — an average of about 50% AMI across the building.

The building is now in lease-up. Fund I investors are admitted only after the permanent C-PACE loan closes and the building reaches 90%+ occupancy — so investors do not carry lease-up or stabilization risk.

TIMELINE

Residency at Sky Village

5645 Fernwood Avenue, Los Angeles, CA · High-rise transit-oriented affordable housing

Architect's rendering

THE COMMUNITY

Sky Village is a 523-apartment, 37-story Type I-A concrete high-rise — a two-phase transit-oriented community rising beside the Hollywood Freeway, minutes from Metro rail and bus lines. It is among the largest affordable developments underway in Los Angeles, built for individuals and small households.

Every apartment is income-restricted, serving households from 30% to 80% of Area Median Income — about 50% AMI on average.

Construction completes in Q4 2029 – Q1 2030, with pre-leasing from March 2029 and a 12–15-month lease-up. Credits are conservatively modeled from a 2031 placed-in-service year; the partnership may elect to defer the first credit year so credit delivery tracks occupancy.

TIMELINE

Investors own a share of the real estate

Affordable Slice Fund I (Hollywood, Burbank) and Fund II (Sky Village) are the limited partner in each project partnership. Investors in the Funds receive the credits, depreciation and a share of each project's cash flow and refinance proceeds.

Unit mixes and rents reflect the projects' CDLAC/TCAC filings (May 2025 – May 2026) and may change with final agency approvals; rents shown are tenant-paid restricted rents before utility allowances.

Built as a real partnership: the Fund, as limited partner, carries the full economic upside and downside of the three partnerships; investor-level features (the Year-11 put option, the IRR floor and the back-end warrant) will be structured with tax counsel so every investor keeps a real upside and downside and remains a bona fide partner. The Year-11 put is an option held by the investor and a contractual obligation of each Fund, funded through a Fund reserve. Financial figures come from the Affordable Slice underwriting model (v58 r8) and project sources-and-uses; they are projections only. This document is not an offer to sell securities; any offering will be made only through definitive Fund documents to qualified investors.
